Experience

WEB DEVELOPMENT TRAINER
United Institute of Management

📅 Aug 2023 – Present 📍 Prayagraj, UP

- Conducted comprehensive web development sessions, mentoring 100+ students in project development, offering personalized feedback, and fostering collaborative learning in club classes.
- Developed responsive websites including portfolios, games, expense trackers, and e-learning platforms, promoting critical thinking and interactive learning.

INTERN - INTERNATIONAL EDUCATION CAMP FOR DEVELOPMENT
Asian Institute of Technology

📅 Sep 2024 – Sep 2024 📍 Bangkok, Thailand

- Enhanced understanding of innovative technologies for development and gained hands-on experience in Generative AI, Design Thinking, GIS technology, Brain-Computer interaction(BCI).
- Led a team to develop an 'Adaptive Traffic Light and Smart Interations' prioritizing emergency vehicles, utilizing AI, IoT, and sensors, while enriching technical and leadership skills.

Recent Projects

WANDERLUST : TRIP WEBSSITE TO EXPLORE THE WOLRD
Tech- Node.js, express.js, MongoDB, Mongoose, JavaScript, Bootstrap

📅 Aug 2024 – ongoing

Developed a comprehensive travel booking platform, "Wonder Lust," , emulating the features of Air-Bnb. Created distinct interfaces for both users and administrators, with secure login and authentication mechanisms for each role. Designed and implemented user-friendly interfaces for admins to list travel services. Enable users to seamlessly book accommodation and travel options throughout secure authentication system.

EXPENSE TRACKER WEBSITE
Tech - Html, Css , JavaScript

📅 Mar 2024

Developed an intuitive web application which enable users to log and categorize their financial transactions as income or expenses. Implemented automatic calculation of net balance, with a detailed summary of all transactions. Provided a user-friendly interface for tracking and managing personal finances.

YOUTUBE CLONE
Tech - Bootstrap, Html, Css, Javascript,Apis

📅 Dec 2023

Designed and developed a YouTube clone utilizing HTML, CSS, and JavaScript. Integrated YouTube API for fetching and displaying video content dynamically. Implemented functionality to redirect users to YouTube for video playback. Ensured a seamless user experience by replicating the core features and interface of YouTube.
